PRE-DELIVERY INSPECTION

VIN: VGA
The dealer must carry out the pre-delivery inspection and supply the preparation sheet for the delivered vehicle.

Inspection on delivery

Customer signature
I have inspected the appearance of the vehicle and signed the pre-delivery preparation sheet for my vehicle, I did not notice any anomaly. I have been informed that it is important to read the user manual and maintenance book.

Date:

Customer signature:

Dealer signature

I confirm that the vehicle identified above has undergone preparation and a pre-delivery inspection as specified by PEUGEOT MOTOCYCLES. I have supplied the customer with the user manual and maintenance book. I have explained how to operate the machine's controls and emphasised that it is important to consult the user manual and PEUGEOT MOTOCYCLES warranty conditions.

Date:

Dealer signature:

INFORMATION

You have just bought a Peugeot vehicle. We would like to thank you for purchasing one of our products. Your vehicle is built to last but this does not mean that it does not require a minimum amount of maintenance.

Your authorised dealer is familiar with all the vehicle's characteristics and has genuine spare parts and specific tools. He can advise you and service your vehicle in the best conditions according to the established service schedule to ensure that you can enjoy driving it in complete safety.

This manual must be considered as an integral part of the vehicle and must remain with it even if the vehicle is sold on.

In particular, you will find the safety instructions, warnings, important notes and comments in it.

PEUGEOT MOTOCYCLES is constantly improving its vehicles. It therefore reserves the right to remove, modify or add any reference mentioned

The only authentic documents are those available online at the above address.

The following symbols mean:

	You are advised to read the full version of the user manual.
	Operation that can be dangerous for people.
	Operation that can be hazardous to the vehicle.
	Gives key information concerning operation of the vehicle.
	An asterisk indicates equipment depending on the version.
	The product pollutes. Do not dispose of it in the environment.

DIAGNOSTIC AND PERSONAL DATA

When diagnostic tools are connected to your vehicle, they collect data. This data includes your vehicle's identification number (VIN).

For further information on your rights or the way PEUGEOT MOTOCYCLES processes data, please refer to our privacy policy at the following address:

<https://peugeot-motocycles.com/fr/mentions-legales/>

Or contact us at:

dpo@peugeotmotocycles.com

MANUFACTURER'S WARRANTY

(March 2022 edition)

The manufacturer of your vehicle, PEUGEOT MOTOCYCLES, which has its head office at rue du 17 novembre - 25350 Mandeure (France), hereinafter PEUGEOT MOTOCYCLES, offers you a commercial warranty on your new combustion engine or electric vehicle against any material or construction defects.

These manufacturer warranty terms are also available on the website.

<https://www.peugeot-motocycles.fr/documentation>

Duration of the warranty

Unless specific contrary provisions have been brought to your attention (warranty extension, fleet agreement, etc.), PEUGEOT MOTOCYCLES grants your vehicle a manufacturer's warranty for a period of:

- 24 months for private use, unlimited mileage;
- 24 months for professional use, limited to 20 000 km (<50cc, cat. L1e & L2e) or 30 000 km (>50cc, cat. L3e & L5e).

The term 'trader' is defined as "any public or private natural or legal person acting for purposes relating to their trading, business, craft, professional or agricultural activity, even when they act in the name or on behalf of another trader".

This warranty starts from the first time the vehicle is registered and applies to your vehicle with the exception of:

- The electric vehicle traction battery for which the current warranty is 24 months or 20 000 km, whichever is reached first, subject to the maintenance charges having been done regularly in accordance with the instructions in the PEUGEOT MOTOCYCLES maintenance manual;
- The electric vehicle traction battery for which the stated nominal capacity has declined by less than or equal to 25%, measured by a PEUGEOT MOTOCYCLES network technician during the warranty period. Due to the inherent chemistry of the battery, a decline in battery capacity (and therefore the vehicle's autonomy) may be observed over time, as the vehicle is used and according to the storage conditions;
- The combustion engine vehicle battery for which this warranty is six months subject to a minimum mileage of 200 km per month;
- The stand and the saddle, for which the warranty period is six months.

Scope of the manufacturer's warranty

With the exception of the restrictions stated below, this contractual warranty covers the repair or replacement of parts found to be faulty by PEUGEOT MOTOCYCLES or its representative and any ensuing labour costs.

It should be noted that:

- The repair or replacement of parts under this manufacturer's warranty does not extend the duration thereof. The warranty covering replacement parts fitted to your vehicle expires on the same date as your vehicle warranty;
- The faulty parts replaced under the warranty will be kept and become the property of PEUGEOT MOTOCYCLES.

Conditions of application of the commercial warranty

For optimal cover for work to be carried out on your vehicle under this commercial warranty, PEUGEOT MOTOCYCLES recommends that you exclusively entrust said work to a workshop within the authorised network.

If your vehicle is sold on, its successive owners shall benefit from the warranty until its date of expiry on condition that the application conditions of the warranty have been satisfied by each of them. For this purpose, you undertake to transmit the warranty application terms to the buyer of your vehicle, along with evidence of maintenance operations performed.

The warranty applies on condition that:

- The first "warranty" service has been carried out and the vehicle has been regularly serviced in line with the instructions of the PEUGEOT MOTOCYCLES maintenance manual, and you can provide proof of this (service monitoring sheet, invoices, etc.). A tolerance of 100 km (or 1 month for the annual maintenance) is permitted in relation to the mileage specified in the maintenance schedule;
- The enhanced maintenance schedule is applied for professional use and, where necessary, for private use;
- Original parts have not been replaced with other components that have not been approved by PEUGEOT MOTOCYCLES and/or the assembly of which does not comply with good practices or the recommendations of PEUGEOT MOTOCYCLES (including, but not limited to, exhaust pipe, cylinder, piston, spark plug and the intake silencer on combustion vehicles, fuses, traction battery modules and the traction battery charger on electric vehicles, etc.);
- The vehicle has not been modified, transformed or equipped with accessories that have not been approved by PEUGEOT MOTOCYCLES (including, but not limited to, additional charger for electric vehicles, alarms, radio, headlights, luggage carriers, boosters, etc.);
- The vehicle has not been used for sports competitions;

The warranty does not cover:

- Maintenance operations (such as, but not limited to: oil change, lubrication, adjustment, cleaning, tensioning, etc.) and servicing listed in the PEUGEOT MOTOCYCLES service schedule and required for your vehicle to operate properly;
- The replacement of parts subject to normal wear linked to use of the vehicle, its mileage, its geographical and climatic environment and their non-reusable fastening parts (such as, but not limited to: self-locking nuts, etc.), if this replacement is not due to a manufacturing defect. This includes but is not limited to the following parts:
 - Drive pulley and driven pulley and belt, clutch, rollers, mobile flange, guides, chain, pinion, rear cog;
 - Bearings (wheels, rods, steering, engine, etc.);
 - Bulb, fuse, tyre, brake linings and pads, brake disc, cables and cable controls, spark plug and spark suppressor;
 - Shock absorbers (hydraulic, gas, single spring, elastomer), air filter, entire intake silencer, fuel filter, oil filter, cylinder, piston and piston segments;
 - Exhaust on combustion engine (except unwelded internal elements);
 - Liquids and products (grease, hydraulic fluid, brake fluid, gearbox oil, engine oil and coolant, etc.);
- Repairs resulting from the use of fuels, lubricants or grease other than those recommended by PEUGEOT MOTOCYCLES;
- Repairs resulting from negligence, abnormal use, driving on an impassable or damaged road, failure to follow the advice given in the PEUGEOT MOTOCYCLES service schedule or the user manual, overloading, even temporary, or the driver's lack of experience;

- Repairs due to an accident, theft, fire or natural causes (including, but not limited to hail, flooding, etc.);
- Repairs resulting from lack of vehicle cleanliness;
- Repairs resulting from long storage periods under unsuitable conditions;
- Corrosion or surface oxidation on the chassis, the screws, and, more generally, on all other metal parts, whether treated or not on combustion or electric vehicles (however, pitting corrosion is covered for a period of 24 months);
- The meter or optics for which the presence of steam does not alter information readability or lighting efficiency;
- Noises and vibrations which have no influence on the reliability, safety and road behaviour of the vehicle;
- Any other expenses not specifically included in this warranty or the legal compliance warranty or the legal warranty against hidden defects, such as, but not limited to: costs due to the vehicle being immobilised, loss of use or business, etc.

Geographical scope of application

The warranty is applicable in the countries or territories where the vehicle is marketed by the approved PEUGEOT MOTOCYCLES network (in particular, France, Germany, Italy, Spain) a list of which can be consulted on the manufacturer's website:

<http://www.peugeot-motocycles.com>

The vehicle is intended exclusively for sale and use in the above-mentioned countries and territories excluding all other countries or territories, where the applicable standards may be different to those in the above-mentioned countries and territories, such as, but not limited to, the United States of America, etc. Use of the vehicle in these excluded countries or territories is under the user's entire responsibility and excludes the application of this warranty as well as the vehicle manufacturer's responsibility for any reason whatsoever.

In some countries, especially in European Union Member States, the consumer has rights under the applicable national legislation. These rights are not affected by the warranty as defined above.

IMPORTANT

Products to use

Fuel Exclusively: Unleaded E5 or E10

Engine oil SAE 5W40 100% synthetic
Minimum grade API SN

Final transmission oil SAE 80W90 API GL4

Fork oil Hydraulic oil SAE10W

Grease High-temperature grease
Multi-use grease

Brake fluid DOT 4

The MOTUL logo, featuring the word 'MOTUL' in white, bold, sans-serif capital letters on a red rectangular background.

Tyres

Tyre pressure should be cold-checked regularly. Incorrect pressure causes abnormal wear and affects road behaviour, thus making driving dangerous.

	Front	Rear
Solo	1.8 bars	2.0 bars
Pillion	1.8 bars	2.2 bars

Maintenance advice

Ensure that the servicing schedule for your vehicle is strictly followed to maintain your contractual warranty rights.

A table of inspections for the maintenance schedule is inserted into the maintenance booklet. The registered dealer must add his stamp, the date of servicing and the number of kilometres the vehicle has covered.

In order to maintain maximum safety and reliability of your vehicle, you are advised to have maintenance and repairs carried out by a registered dealer who has the necessary technical training, specific tools and spare parts.

After an accident, it is recommended to have the vehicle inspected and repaired by a registered dealer.

Cleaning the vehicle

The bodywork is made of plastic parts that can be painted or are shiny. Do not use solvents or cleaning products that are too corrosive.

Do not use high pressure cleaners which may cause water to infiltrate the following parts: seals, bearings and hinges, electrical components such as connectors, contactors and lighting.

Wash the bodywork with soapy water and rinse with generous amounts of clear water.

The vehicle can be dried with a chamois leather.

After washing the vehicle, brake several times at low speed to dry out the brakes.

The vehicle should be washed in a place equipped for wastewater collection.

Certain silicon-based products can alter the quality of the paintwork.

In case of need or doubt, a registered dealer can advise you on using cleaning products or restoring scratched bodywork.

Environment / Recyclable

Worn parts replaced during routine maintenance (mechanical parts, battery, etc.) must be disposed of with specialised bodies.

At the end of its life, the vehicle must be taken to an authorised centre for recycling.

In all cases, comply with the local laws.

Batteries contain harmful substances. They must be disposed of according to the legal requirements and must under no circumstances be thrown away in the household waste.

Extended periods of immobilisation and storage

If the vehicle has to be immobilised for more than 1 month, you are advised to carry out the following operations:

Battery

If the vehicle is not used for an extended period, the battery will slowly discharge naturally or due to its electronics or certain accessories and must thus be regularly charged.

- Charge the battery to 100% beforehand (The battery's maximum charging current is equal to 1 tenth of its capacity).
- Use a maintenance charger or charge monthly.
- Before restarting, the battery must be charged to 100%.

If these recommendations are not followed, the battery may go into deep discharge. In this case the manufacturer's warranty will be void.

Machine

- Empty the fuel tank to avoid fuel build-ups.
- Spray a lubricant onto the metal parts of the vehicle to avoid oxidation.
- Store the vehicle in a dry place.

Re-starting your vehicle

You are advised to have the vehicle checked over by a registered dealer if it has been immobilized for an extended period.

PERIODIC SERVICING

Special important points:

- Compliance with the service schedule in light of the conditions of use will help keep your vehicle running smoothly over time and preserve its qualities, while being covered by the warranty. We recommend that you entrust these operations to an authorised Peugeot Motorcycles dealer who has been trained by the manufacturer and has suitable tools.

A tolerance is permitted in relation to the mileage specified in the service schedule:

- 100 km for the first service.
 - 500 km for the following services.
 - 1 month for the annual service.
- As part of its continuous improvement process, Peugeot Motorcycles Groupe reserves the right to make changes to this service schedule without prior notice. Your registered dealer can advise you and service your vehicle in accordance with the most recent recommendations.
 - There is no need for an annual test if a periodic test has been conducted during the year (A maximum of 12 months between two services).
 - From 25000 km (15600 mi), servicing must be performed by repeating operations from 5000 km (3100 mi).
 - Clean or replace the air filter (engine/transmission) more often if the vehicle is used in particularly dusty or humid areas.

Heavy duty servicing / Harsh conditions of use :

Certain components must be serviced more frequently if the vehicle is used in at least one of the following conditions:

Damp or dusty environment, high temperature, exclusively town use, temperatures frequently below -5°C, short journeys or repeated door-to-door journeys with a cold engine in low temperatures, mountain regions, etc.

This concerns in particular: The oil (engine), the spark plug, the filter components, the transmission, the braking system.

The servicing frequency is halved for these components.

Your dealer can advise you on the service schedule adapted to your vehicle and your use

Vehicles used for commercial purposes (home deliveries, couriers, etc.) should, in particular, be subject to heavy duty servicing.

Care / Cleanliness:

In light of the design and aesthetic appeal of a two-wheeled vehicle, numerous components are exposed to the elements. This vulnerability may result in functional or cosmetic damage (corrosion, etc.), even on high-quality parts. This is why proper regular servicing helps not only preserve its appearance, smooth running and your enjoyment; it is also essential to maintain your Warranty rights.

PERIODIC MAINTENANCE TABLE SPEEDFIGHT 150 CC

These maintenance must be carried out by an authorised PEUGEOT MOTOCYCLES representative.

Operations to be carried out	500 km 1 month	3000 km	6000 km	9000 km	12000 km	15000 km	18000 km	Annual maintenance
